Cost Engineering: A Fresh Perspective

Subject: Will explore why a new employee would be attracted to the field of Cost Engineering and Project Controls, plus lessons learned in his first year in this professional field. Offers sound advice for both attracting young professionals into the Cost Engineering expertise, as well as tips to guide and better connect with new entrants into this largely experience-driven field.

Bio: Currently works to support cost assurance efforts for onshore and offshore Chevron major capital projects. Previously has worked in supply chain management for onshore pipe and storage facility projects, Consultant for Governance, Risk management and corporate compliance and Energy Consultant for projects in the Middle East. Matthew has a MS in Engineering Management, BS in Industrial Engineering, and BBA in Finance from Southern Methodist University (SMU).
