Sr. Scheduler - Michigan

Good Afternoon,

I have a new vacancy with our EPC client for a **Sr. Scheduler position in Michigan**. The assignment is expected to last 9 months. However, there is a good chance of remaining on with the company for future projects and even the possibility of direct-hire. This is a \$400MM forest products project. They are looking for someone with 15-20+ years of experience with an emphasis on heavy industrial projects (forest products strongly preferred). This person will also need to have strong field experience and be comfortable heavily coordinating with the Construction Manager. Although P6 is required, they are looking more for a construction person that knows P6 rather than a P6 person that knows construction. Pay rate - 60-65/hr + per diem. 10/5 schedule with OT at 1.5 ST.

If you or someone you know may be interested in the position, please let me know. I am currently having IT issues with receiving some replies to my vacancy distribution emails so please send me a separate email if you are interested.
